

Update: The above schematic is incorrect. Please see here:

<http://www.bmw-planet.com/diagrams/release/us/e46/index.htm>

The positive power wiring to the fogs only have connector breaks for //M's (DME MSS54)

For all other E46's, the wiring goes directly from pin 2 of X44 (relay) to both X768 and X769 - no breaks.

E46 Fog lights
